BUTANE-TO-SYNGAS PROCESSING IN NOVEL MICRO-REACTORS

Book Condition: New. Publisher/Verlag: Südwestdeutscher Verlag für Hochschulschriften | Experimental Investigation of Butane Reforming for Solid Oxide Fuel Cell-based Small-Scale Powerplants | This work investigates the production of syngas from butane by rhodium doped ceria/zirconia nanoparticles. The main issue of this study is to improve the catalytic performance at intermediate temperatures of 550°C. In the range of 500 to 600°C, a packed bed reactor with catalyst nanoparticles of 2.0 wt% Rh loading and silica-based plugs achieves nearly complete butane conversion...

Reviews

The publication is fantastic and great. it absolutely was writtern very completely and beneficial. I am very easily could possibly get a enjoyment of reading a published pdf.

-- **Cortez Parker**

This publication will not be easy to get started on reading through but very exciting to read. I really could comprehended almost everything using this composed e publication. I am effortlessly could possibly get a enjoyment of reading through a composed book.
