Createspace, United States, 2015. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****.John C. Moser s career spans over 50 years, and his research has focused on understanding the biology of town ants (*Atta texana*) and phoretic mites and other associates of ants and pine bark beetles. His approach to developing methods for the control of these pests has been to understand more completely the biology of these organisms. This research approach has established Moser as an internationally recognized expert in leaf-cutting ant biology and as a premier authority on phoretic mites and other associates of pine bark beetles. John s efforts have led to the largest collection (over 30,000 specimens) of mites associated with forest insects in the world. This knowledge is leading entomologists, ecologists, and pathologists to consider the possible role of mites in insect-fungal symbioses and disease transmission in trees.
