Atlantic Publishers & Distributors (P) Ltd., 2012. Softcover. Book Condition: New. Biomedical laboratory involves a number of distinct disciplines. However, all these disciplines can be conveniently grouped under two major headings, viz. ?Conventional laboratory techniques?, and ?Modern laboratory techniques? Laboratory medicine is the supporting science, which includes many basic techniques required by medical practitioners and professionals for diagnosis, treatment and management of illness being suffered by the patients. The phenomenal growth of paramedical science or laboratory medicine today would not have been possible without these basic techniques. A Textbook of Biomedical Laboratory Techniques aims at providing valuable information on important biomedical laboratory techniques with illustrations on haematology, serology, blood bank techniques, urine, sputum, seminal fluid and motion analyses, histopathological techniques, immunodiagnostic techniques, etc. Various types of biomedical laboratory analyses have been explained in detail. The book has been written in simple style and lucid manner for easy comprehension by the readers. It will prove useful for the students and teachers of medical sciences in universities, colleges and institutes. It will also benefit the professionals and technicians working in pathological laboratories, hospitals and clinics. Contents : Preface; 1. Haematology; 2. Serology; 3. Blood Bank Analysis; 4. Clinical Biochemistry; 5. Histopathological Techniques; 6. Stool Analysis; 7. Urine Analysis; 8. Sputum Analysis; 9. Seminal Analysis; 1. Autoanalyzer; 11. Immunodiagnostic Techniques Printed Pages: 167.
